This Addendum to the program guidelines for the Public Sector Energy Efficiency Program (PSEE) applies to new applications processed after March 5, 2010 and received by close of business April 22, 2010, for projects that will be completed by the end of the Program Year, May 31, 2010. PSEE applicants are eligible for either the Incentive Bonus or Special Incentive Rate based on eligibility described below. These PSEE incentives are only available as long as funds last. All other program provisions and limitations apply.

### **1.0 Incentive Bonus**

For state and federal government applicants, including Illinois state universities, the incentive rates shall be revised as follows:

Standard incentives for lighting, HVAC equipment, motors, and refrigeration equipment shall be increased by 15% from the levels listed in Appendix B “Standard Program Incentive Worksheets” of the program guidelines.

The incentive for variable speed drives on HVAC motors shall be increased from \$55 per horsepower to \$75 per horsepower.

Custom incentives shall be increased from 8 cents per kilowatt-hour to 9.2 cents per kilowatt-hour. For exterior lighting pilot projects of breakthrough equipment and devices the incentive shall be increased to \$0.23 per kWh.

### **2.0 Special Incentive Rate for Communities and Schools**

For units of local government, public school districts, and community college applicants the incentive rates shall be revised as follows:

Standard incentives for lighting, HVAC equipment, motors, and refrigeration equipment shall be temporarily doubled from the levels listed in Appendix B “Standard Program Incentive Worksheets” of the program guidelines.

Custom incentives shall be increased from 8 cents per kilowatt-hour to 16 cents per kilowatt-hour. For exterior lighting pilot projects of breakthrough equipment and devices the incentive shall be increased to \$0.40 per kWh.

### **3.0 Maximum Incentive**

For state and federal government applicants, including state universities the total incentive cannot exceed 100 percent of the incremental measure cost and 75 percent of the total project cost. For units of local government, public school districts, and community colleges, total incentive cannot exceed 100 percent of the incremental measure cost and 90 percent of the total project cost.

### **4.0 Application Process**

Applicants seeking the Incentive Bonus or Special Incentive Rate should submit the normal PSEE application. DCEO program staff will calculate and apply the additional incentive depending on applicant eligibility and funding availability.
